

**RETHINK THE RINK**  
ARCHITECTURE FOR ICE HOCKEY

## WE DESIGN THE PLACES WHERE GREAT PEOPLE THRIVE.

For over three decades, JLG's Sport studio has worked alongside professional sport associations, universities, k12 schools, and communities to deliver collaborative design solutions that balance athletics, entertainment, budget, operation, and revenue. Packaged into award-winning design solutions, the Sport studio specializes in unrivaled fan and athlete experiences that are designed to drive local revenue and global recruitment. Our first ice hockey projects were for two of Minnesota's top state championship high schools; today, we are a recognized design leader in the field and are working with the top Division 1 schools in the country with 38 national titles between them. Our portfolio includes NHL and AHL clients, and we are the architect-of-choice for the National Collegiate Hockey Conference. JLG brings a team of ice hockey engineering firms that know what it takes to make these spaces run efficiently and effectively – we are the nation's ice hockey experts.
